

pdfDocs OCR Server

pdfDocs OCR Server provides businesses with an OCR solution that integrates with their existing business applications to capture critical business information locked away in image files, which can then be made accessible to all in a format that is accessible and searchable.

Increase productivity and efficiency

Fastest, most reliable OCR engine

No retyping of documents

Advanced document management integration

Cost-effective OCR solution

Supports business processes and workflow

INTEGRATED OCR SOLUTION

When used in conjunction with pdfDocs Desktop, users may choose to OCR specific documents, or administrators can leverage multi-function devices and pdfDocs Watchfolders to provide automated workflows whereby all documents are converted to text-searchable PDFs.

INFORMATION AT YOUR FINGERTIPS

Converting image files to text-searchable PDF documents delivered to every desktop gives everyone instant access to all the critical business information they need to make the right business decisions.

"I highly recommend this product to any law firm that wants efficient software to organize its PDF documents — this is the best I have seen to date."

**Legal Assistant
Today: Milton
Hooper, litigation
support specialist**

"All in all, pdfDocs Desktop can serve as an adequate substitute for Acrobat Professional (and a lot less expensively). The pdfDocs OCR Server is also worth a serious look."

**TechnoLawyer: John Heckman,
legal technology consultant**

DOCUMENT MANAGEMENT INTEGRATION

pdfDocs OCR Server integrates via desktop clients into Autonomy iManage and OpenText eDOCS document management systems.

LOCATE DOCUMENTS INSTANTLY

Never lose another document again. Locating documents misfiled on a network is a time-consuming and costly exercise. Converting image files to text-searchable PDF documents can help solve this problem.

Once converted, you can search your network for specific document content using Google Desktop Search or other third party products.

PDF TO WORD

Never type another document again. pdfDocs OCR Server converts PDF documents to MS Word files.

pdfDocs OCR Server enables users to convert PDF documents to MS Word documents, allowing free-flowing text for easy editing and formatting, and PDF/A for archiving.

BRINGING IT ALL TOGETHER

pdfDocs OCR Server integrates with your scanners, MFDs, document management systems and other business-critical applications to produce seamless, secure business documents that can be safely distributed inside and outside the organization.

SYSTEM REQUIREMENTS OPERATING SYSTEMS

Windows XP with Service Pack 3 (or)
Windows 7 (or)
Windows Server 2008 (or)
Windows Server 2008 R2
32 bit or 64 bit
4GB RAM
2GB disk space for program files and document cache

Microsoft .NET Framework 3.5 (this is already included in Windows 7 and Microsoft Server 2008 R2).
3.5 SP1 recommended.
Microsoft .NET Framework 4.0 Extended
pdfDocs OCR Server can be run on a virtualized Windows environment such as VMware.
