

compareDocs

The compareDocs approach to document comparison and workflow is unique. Its easy to use interface lets you compare anything to anything, working seamlessly with the applications you use every day—MS Word, Outlook and Adobe Reader. No more proprietary viewing technology; no more reformatting documents; no more time wasted.

Easy to use interface

Reduce costs and risks

Streamline document review process

Increase collaboration

Help with eDiscovery and document management

Enterprise-wide solution

Out-of-the-box integration with leading Document Management Systems

EFFICIENCY THROUGH INTEGRATION

compareDocs identifies changes in document versions and outputs the changes directly to Word or PDF so that you can continue to work on the document. The result is a seamless, integrated workflow that delivers unprecedented levels of accuracy and efficiency.

FAST AND ACCURATE COMPARISON

As business embraces the notion of collaboration, the need for a robust document comparison and control solution becomes even more critical. Manually comparing and contrasting documents is a time-consuming process that is prone to error. compareDocs gives business a solution that is fast, accurate and efficient.

"compareDocs is a viable alternative to other existing options. It would be my first choice in recommending an electronic redlining program."

TechnoLawyer: John Heckman, legal technology consultant

"I am thrilled to find a simple and reliable document comparison tool in pdfDocs' compareDocs. I appreciate uncomplicated software that does a specific task, and does it very well. compareDocs focuses solely on comparing documents and, for that, the software has no comparison."

Legal Assistant Today: Brett Burney, legal technology consultant

COMPARE APPLES WITH ORANGES

Compare two MS Word documents and output the Comparison Report as a working MS Word document. You can accept/reject changes in the document using MS Word's track changes functionality.

compareDocs goes beyond the simple Word-to-Word or PDF-to-PDF comparison solution. With compareDocs you can compare apples to oranges, that is Word to Word, PDF to PDF, Word to PDF, anything to anything.

With OCR Server installed, you can compare PDF to PDF and output the Comparison Report as a MS Word document. Or, compare two image documents.

DOCUMENT MANAGEMENT INTEGRATION

compareDocs integrates with Autonomy iManage, Open Text eDOCS DM and Worldox document management systems.

A single right-click on a document allows users to compare documents stored inside the DMS environment.

COMPLIANCE

compareDocs enables business to meet industry and corporate compliance regulations by providing a reliable tool for tracking, discovering and reporting changes to business-critical documents.
