

- Easy to use interface
- Multiple Organizer and Binder Projects
- Advanced document management integration
- Dual integration with MS SharePoint and iManage
- Cost-effective PDF management solution
- Enhanced business processes and workflow

pdfDocs Desktop 3.2

Businesses have long recognized the importance of the Portable Document Format (PDF) when distributing documents via email or for document management. The problem has been that too many PDF solutions are expensive, making it impossible to put the power of PDF on every desktop.

DO MORE, PAY LESS

pdfDocs Desktop is a cost-effective enterprise-wide solution. It enables corporations, government agencies and professional service firms to realize significant gains in efficiency and productivity through enhanced integration and workflow.

pdfDocs Desktop integrates into business applications, processes and systems to help manage business-critical documents and forms.

MULTIPLE ORGANIZER PROJECTS

pdfDocs Organizer lets you assemble and collate documents from different applications and systems into a single secure PDF document. You can edit, redact, annotate and secure the content as well as apply stationery, watermarks or numbering sets across all the documents stored in the Organizer Project.

You can set up multiple Organizer Projects within pdfDocs Desktop. Import all the content related to a specific case, matter or project into the appropriate Project folder. Each Project folder can be configured with individual output settings.

MULTIPLE BINDER PROJECTS

pdfDocs Binder converts documents or entire folder structures into a single or multi-PDF document, automatically generating a table of contents, cross-document hyperlinks and bookmarks.

You can insert cover pages and apply headers and footers across the Binder Project in a single click. Create templates and cover pages to minimize workload. Print the Table of Contents as a reference document.

With pdfDocs Desktop you can set up multiple Binder Projects for different clients or projects. Each project has its own settings and configuration.

EXTEND YOUR AUTONOMY DMS

pdfDocs Desktop integrates completely with Autonomy iManage formerly Interwoven WorkSite), providing users with a number of integration points.

Users can save documents to PDF directly into iManage and instantly convert documents in iManage to PDF as new or related documents.

MS SHAREPOINT INTEGRATION

pdfDocs Desktop 3.2 allows users to Save into and export documents and libraries from MS SharePoint. pdfDocs Desktop 3.2 provides dual integration with Autonomy iManage and MS SharePoint.

REDUCE BUSINESS RISK AND EXPOSURE

Sharing documents online can be risky. Print your business documents to pdfDocs Desktop to remove the metadata and to prevent document tampering.

"I highly recommend this product to any law firm that wants efficient software to organize its PDF documents — this is the best I have seen to date."

Legal Assistant
Today: Milton
Hooper, litigation
support specialist

"All in all, pdfDocs Desktop can serve as an adequate substitute for Acrobat Professional (and a lot less expensively). The pdfDocs OCR Server is also worth a serious look."
