

pdfDocs FORMFILLER provides businesses with a PDF forms solution to enhance business processes and workflow. PDF forms can be viewed, edited, saved, digitally signed and distributed in a format that is safe, secure and universal.

AN ELECTRONIC FORMS SOLUTION

In the past business has had too few choices with regard to electronic forms. Adobe Reader allows you to fill in data only—you cannot save or edit the data.

The high cost of Adobe Acrobat Professional as a filler application makes the distribution of forms within the business prohibitive.

pdfDocs formFiller gives business a form solution at a price it can afford.

EDIT AND SAVE AT WILL

pdfDocs formFiller allows you to type data directly into a PDF form, save, close and continue to edit or complete later.

DOCUMENT MANAGEMENT INTEGRATION

pdfDocs formFiller completely integrates with Interwoven to give users the power to fill in and edit PDF forms. Forms can be retrieved from and saved into the document management system.

FORM FLEXIBILITY

Data entered into the form can be “flattened” using the pdfDocs Desktop software. This way the data is always associated with the form and it cannot be lost, edited or changed in any way.

Forms can be saved and routed to others in the organization to complete a business process or workflow.

Data can be exported as a data file to be archived or imported into another PDF form or software application.

FOR YOUR EYES ONLY

pdfDocs formFiller enables you to encrypt PDF forms with a password to protect user data and to digitally sign documents.

THE pdfDOCS SOLUTIONS SUITE

The pdfDocs Solutions Suite provides business with a complete and affordable PDF solution.

pdfDocs formFiller is part of the pdfDocs Solutions Suite. Desktop, OCR Server and Process Server are some of the other products that make up the suite.

DESKTOP

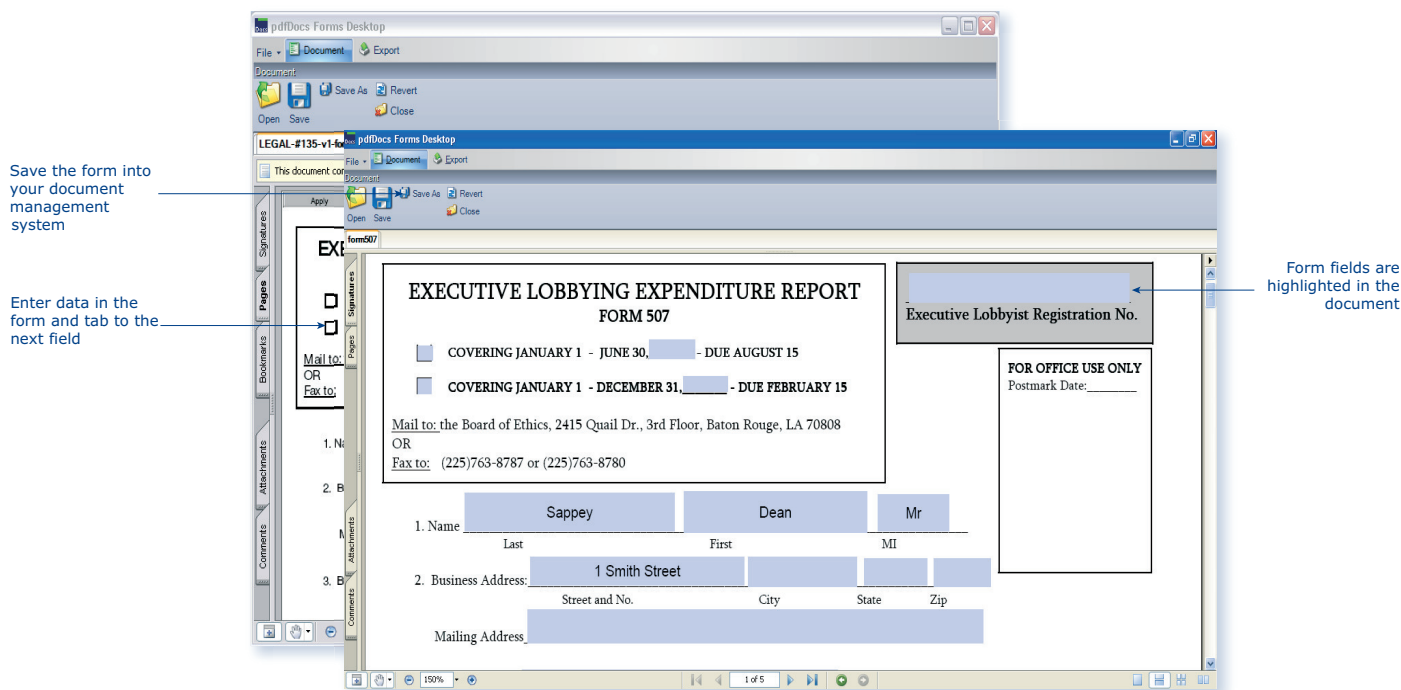

Integrates with your business applications, scanners, MFDs, document management and records management systems to combine and collate documents that can be distributed in a format that is safe, secure and universal. Add form fields to a document to create an electronic form.

OCR SERVER

Converts non-searchable image files into text-searchable PDF documents. Documents can also be converted to Word or RTF files. Once converted, documents are automatically delivered to all pdfDocs Desktop users.

PROCESS SERVER

Provides an automated document processing solution. Automatically create PDF documents, collate with other documents, apply watermarks and page numbering. Save the document to the network or profile it in a document management system.

SYSTEM REQUIREMENTS

OPERATING SYSTEMS

- Windows 2000 (SP3 or above) workstation
- Windows XP Professional workstation (SP1 or above)
- Windows 2000 Terminal Server/Citrix Server (SP3 or above)
- Windows 2003 Terminal Server/Citrix
- Supports XP Fast user switching and multiple user sessions.
- Supports installation via Active Directory or other network rollout products.
