See the difference

The compareDocs approach to document comparison and workflow is unique.

Its easy to use interface lets you compare anything to anything, integrating seamlessly into the applications you use every day—MS Word, Outlook and Adobe Reader. No more proprietary viewing technology; no more reformatting documents; no more time wasted!

Instead, its leading-edge technology identifies changes in documents and outputs the changes directly to Word or PDF so that you can continue to work on the document. The result is a seamless, integrated workflow that delivers unprecedented levels of accuracy and efficiency.

A DOCUMENT COMPARISON SOLUTION

As business embraces the notion of collaboration, the need for a robust document comparison and control solution becomes even more critical.

Manually comparing and contrasting documents is a time consuming process that is prone to human error. pdfDocs compareDocs gives business an automated solution that is accurate and efficient.

TWICE THE COMPARISON

compareDocs goes beyond the simple Word-to-Word or PDF-to-PDF only solution.

As a stand alone application, compareDocs will compare Word to Word and PDF to PDF.

COMPARING APPLES WITH ORANGES

When bundled with pdfDocs Desktop, compareDocs compares apples to oranges, that is Word-to-Word, PDF-to-PDF, Word-to-PDF, anything-to-anything.

DOCUMENT MANAGEMENT INTEGRATION

pdfDocs compareDocs integrates with Interwoven, NetDocuments, Open Text and WORLDOX document management systems.

A single right-click on a document allows users to compare documents stored inside the system without leaving the DMS environment.

COMPLIANCE

pdfDocs compareDocs enables business to meet industry and corporate compliance regulations by providing a reliable tool for tracking and discovering changes to business-critical documents.

"compareDocs is a viable alternative to other existing options. It would be my first choice in recommending an electronic redlining program."

TechnoLawyer:
John Heckman,
legal technology
consultant

"I am thrilled to find a simple and reliable document comparison tool in pdfDocs' compareDocs. I appreciate uncomplicated software that does a specific task, and does it very well. compareDocs focuses solely on comparing documents and, for that, the software has no comparison."
