

pdfDocs Desktop provides businesses with a PDF solution that integrates with their existing business applications enabling them to exchange critical business documents in a format that is safe, secure and universal.

Businesses have long recognized the importance of the portable document format (PDF) when distributing documents via email or for document management. The problem has been that too many PDF solutions are expensive, making it impossible to put the power of PDF on every desktop.

pdfDocs Desktop provides business with a PDF solution at a price they can afford.

BUSINESS INFORMATION AT YOUR FINGERTIPS

pdfDocs Desktop converts scanned image files and delivers them to individual desktops within minutes. pdfDocs gives you instant access to all the critical business information you need to make profitable business decisions.

DOCUMENT MANAGEMENT INTEGRATION

pdfDocs Desktop integrates with the world's leading document management and records management systems, giving users the power to create secure PDF documents directly within the document management system.

INCREASE EFFICIENCY AND PRODUCTIVITY

pdfDocs Desktop gives everyone in the organization the ability to create and manage PDF documents, convert image files to PDF documents and to create and fill in PDF forms.

REDUCE BUSINESS RISK AND EXPOSURE

Sharing documents online can be risky. Print your business documents to pdfDocs Desktop to remove the metadata and to prevent document tampering. The unique pdfDocs Redaction tool enables you to completely remove confidential or private information from the document.

BRINGING IT ALL TOGETHER

pdfDocs Desktop integrates with MS Office software, scanners, MFDs, document management systems and other business critical applications to produce seamless, secure business documents that can be safely distributed inside and outside the organization.

Print any business document to pdfDocs Desktop to create a PDF document that you can email to anyone—no need to worry about file size, document security or document integrity.

THE pdfDOCS SOLUTIONS SUITE

The pdfDocs Solutions Suite provides business with a complete and affordable PDF solution.

pdfDocs Desktop is part of the pdfDocs Solutions Suite. OCR Server and Process Server are two other products that are part of the suite.

OCR SERVER

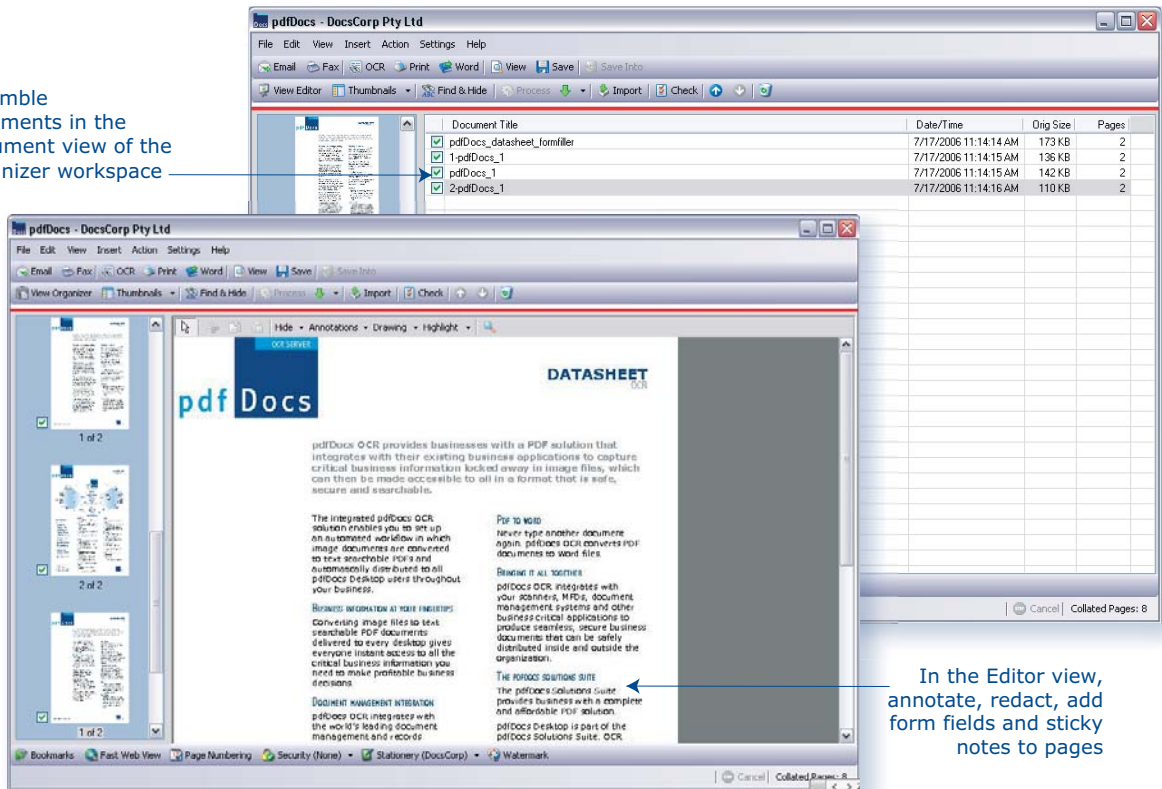

Converts non-searchable image files into text-searchable PDF documents. Documents can also be converted to Word or RTF files. Once converted, documents are automatically delivered to all pdfDocs Desktop users.

PROCESS SERVER

Provides an automated document processing solution. Automatically create PDF documents, collate with other documents, apply watermarks and page numbering. Save the document to the network or profile it in a document management system.

DATASHEET DESKTOP 1.8

Assemble documents in the Document view of the Organizer workspace

In the Editor view, annotate, redact, add form fields and sticky notes to pages

SYSTEM REQUIREMENTS
