

pdfDocs Desktop integrates into business-critical applications, processes and systems to enhance efficiency, workflow and the exchange of sensitive business documents outside the company firewall in a format that is safe, secure and universal.

- Easy to use interface
- Unique Organizer workspace
- Easy document assembly
- Advanced document management integration
- Cost-effective PDF content management solution
- Supports business processes and workflow

A COST-EFFECTIVE SOLUTION

Businesses have long recognized the importance of the portable document format (PDF) when distributing documents via email or for document management.

The problem has been that too many PDF solutions are expensive, making it impossible to put the power of PDF on every desktop. pdfDocs Desktop provides business with a PDF solution at a price they can afford.

"I recommend it as a good Adobe Acrobat alternative. After using it to edit multiple PDFs as one file, I now see the beauty of the implementation."

Law Office Computing Review: Richard C. Belthoff Jr., vice president and assistant general counsel at Wachovia Corp.

BRINGING IT ALL TOGETHER

pdfDocs Desktop integrates with MS Office software, scanners, MFDs, document management systems and other business critical applications to produce seamless, secure business documents that can be safely distributed outside the organization.

KNOWLEDGEONE INTEGRATION

pdfDocs Desktop integrates completely with Knowledgeone and RecFind Corporate, enabling users to create and save documents as PDF. Additional functionality enables users to email documents as PDF directly from MS Word to third parties.

BUSINESS INFORMATION AT YOUR FINGERTIPS

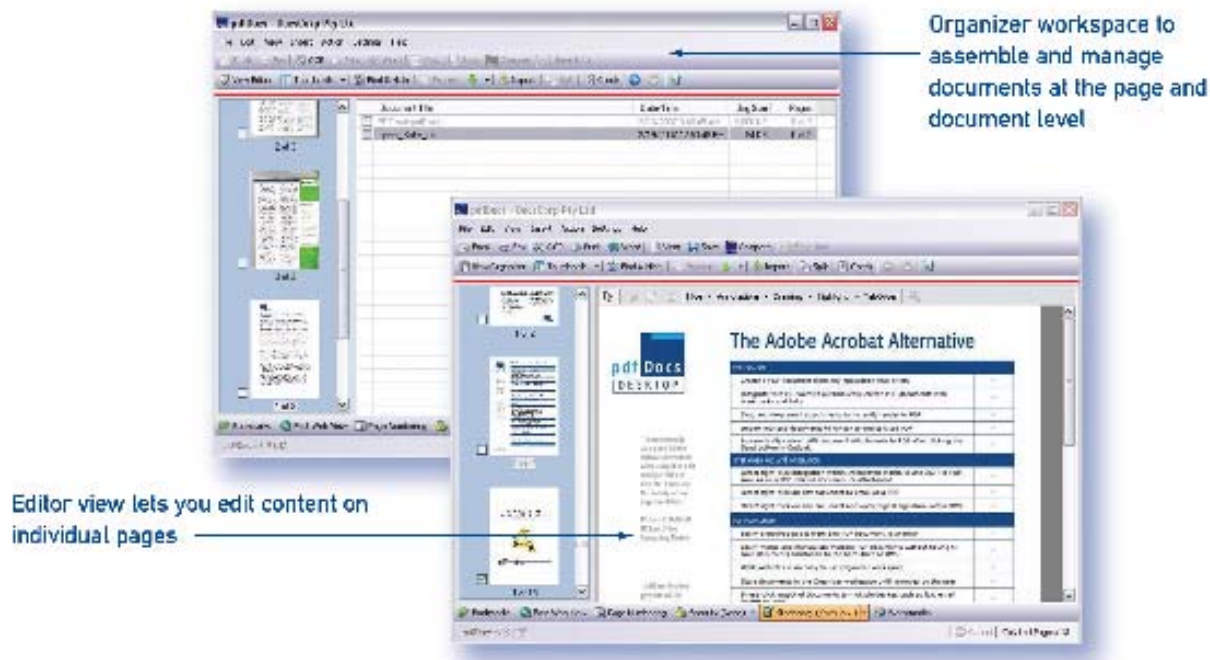

pdfDocs Desktop converts scanned image files and delivers them to individual desktops within minutes. pdfDocs gives you instant access to all the critical business information you need to make profitable business decisions.

INCREASE EFFICIENCY AND PRODUCTIVITY

pdfDocs Desktop gives everyone in the organization the ability to create and manage PDF documents, convert image files to PDF documents and to create PDF forms.

REDUCE BUSINESS RISK AND EXPOSURE

Sharing documents online can be risky. Print your business documents to pdfDocs Desktop to remove the metadata and to prevent document tampering. The unique pdfDocs Redaction tool enables you to completely remove confidential or private information from the document.

Organizer workspace to assemble and manage documents at the page and document level

Editor view lets you edit content on individual pages
