## cleanDocs removes metadata at sub-second speeds

cleanDocs removes metadata from documents at sub-second speeds. It can achieve these speeds thanks to binary-level and multithread processing.

Below is a sample of cleanDocs speed.

| DOCUMENT                      | cleanDocs |
|-------------------------------|-----------|
| Simple 10-page document       | 0.43 s    |
| Simple 100-page document      | 0.49 s    |
| Complex 10-page document      | 0.6 s     |
| Complex 100-page document     | 1.57 s    |
| 4 x simple 10-page documents  | 0.99 s    |
| 4 x complex 10-page documents | 1.38 s    |
